Alex Doe

(555) 555-0142 | alex.doe@example.com | linkedin.com/in/your-name | github.com/your-username
Springfield, ST | Willing to relocate

Education

B.S. Electrical Engineering, GPA [X.XX]/4.00 — Expected Spring 2027
[University]
Relevant coursework: Embedded Systems, Power Electronics, Digital Design
Activities: IEEE student branch, Tau Beta Pi

Projects

CubeSat Power Board (KiCad, LTspice) — Fall 2025 – Spring 2026

- Designed a [X] W CubeSat buck converter in KiCad and LTspice, measured at [X]% efficiency on an electronic load
- Cut output ripple from [X] mV to [X] mV by shrinking the switching loop, verified on an oscilloscope

Bench Data Logger (STM32, C, Python) — Spring 2025

- Wrote STM32 firmware in C to sample a 4-channel SPI ADC at [X] kHz and stream it to a Python logger
- Moved UART writes to DMA after a logic analyzer showed dropped samples, cutting losses to [X]%

Experience

Sales Associate, [Retail store] — May 2023 – Aug 2024

- Processed about [X] sales and returns a shift at the register
- Trained [X] new hires on the register and the closing checklist

Skills

Software: KiCad, LTspice, C, Python
Hardware/Lab: STM32, Oscilloscope, Electronic load, Logic analyzer
