Alex Doe

(555) 555-0142 | alex.doe@example.com | linkedin.com/in/alex-doe-example | github.com/alex-doe-example
Springfield, ST | Willing to relocate

Education

B.S. Electrical Engineering, GPA [X.XX]/4.00 Expected Spring 2027
[University]
Relevant coursework: Embedded Systems, Introduction to High Power Electronics, Advanced Digital Design
Activities: IEEE student branch, Tau Beta Pi

Projects

CubeSat Power Board (KiCad, LTspice) Fall 2025 – Spring 2026

- Designed a [X] W synchronous buck converter in KiCad for a CubeSat power board and measured [X]% efficiency on an electronic load, within [X]% of the LTspice model
- Shrank the switching loop on the second board revision and cut output ripple from [X] mV to [X] mV on an oscilloscope, within [X]% of a hand calculation

Bench Data Logger (STM32, C, Python) Spring 2025

- Wrote STM32 firmware in C that reads a 4-channel SPI ADC at [X] kHz and streams the samples over UART to a Python script that logs each run to CSV
- Traced dropped samples to a blocking UART write with a logic analyzer, moved transfers to DMA, and cut lost samples from [X]% to [X]%

Experience

Sales Associate, [Retail store] Summer 2023 – Summer 2024

Skills

Software: KiCad, LTspice, C, Python
Hardware/Lab: STM32, Oscilloscope, Electronic load, Logic analyzer
