Alex Kim

(555) 555-0123 | alex.kim@example.com | linkedin.com/in/alex-kim-example | github.com/alex-kim-example
Riverton, ST | US Citizen | Willing to relocate

Education

B.S. Computer Engineering, GPA 3.45/4.00 Expected Spring 2029
Example State University
Relevant coursework: Digital Logic, Circuits I, Programming in C, Discrete Math
Activities: Robotics Club, electrical lead, IEEE student branch

Projects

Weather Station with Wireless Logging Spring 2027
ESP32, C, BME280, Python

- Logged temperature, humidity and pressure every 60 s for 30 days with an ESP32 and BME280 sensor, losing under 1% of readings over Wi-Fi
- Matched a reference thermometer within 0.5 °C by calibrating the sensor in C against 20 readings taken across a 15 °C range
- Wrote a Python script that plots each day's data and flags gaps, checked against the raw CSV logs

4-Bit ALU on a Breadboard Fall 2026
74HC logic, Logisim

- Built a 4-bit ALU from 14 74HC-series chips that adds, subtracts and runs three logic operations, verified against all 256 input pairs in Logisim
- Found and fixed two carry-chain wiring faults by probing each stage with a logic analyzer

Experience

Barista, Example Coffee Co., Riverton, ST May 2025–Present

Skills

Software: C, Python, Logisim, KiCad, Git
Hardware/Lab: Oscilloscope, Logic analyzer, Soldering, ESP32
